Product Overview

The Multi-Polarized Sector 120-2.4GHz is constructed of UV stabilized polymers and high grade aluminum for extremely long service life in the most demanding conditions. With a 120° directional pattern it provides exceptional 10dBi high gain effective power and is ideal for indoor and outdoor deployments where a sectorized approach is required to accommodate clients in a variety of points. Weighing only 10 oz, the Sector 120-2.4GHz can easily be mast or wall mounted with available mounting hardware. Multi-Polarized antenna technology provides unequalled wireless communication in “Real World” obstructed non-line-of-sight (NLOS) environments.
